

## **BRITISH STANDARD PROBES**

### **Description**

**British Standard Remote Probes** comprise a 'Schrader' quick connector, a gas specific indexing collar and a hose insert.

**British Standard Direct Probes** comprise a 'Schrader' quick connector, a gas specific indexing collar and a male threaded connector.

**All probes are manufactured from Stainless Steel and are available for the following gases:-**

**Oxygen  
Nitrous Oxide  
Nitrous Oxide / Oxygen Mixture  
Medical Air (4 Bar)  
Surgical Air (7 Bar)  
Vacuum**

**Other gases are available on request although these are outside of the scope of BS 5682 : 1998**

**Remote Probes are available with either a straight or angled hose insert for crimping into 6.4mm bore hose with a ferrule.**

**Direct Probes are available with a 3/8" BSP male threaded connector for direct coupling to equipment, for example flowmeters or suction controllers.**

**Suitable Anti-static Hose, Ferrules and Colour Coding bands to maintain conformance to BS EN 739 : 1998 are available.**

### **Designed to meet the requirements of;**

- **HTM 2022**                      **Medical Gas Pipeline Systems.**
- **C11**                              **NHS Model Engineering Specification – Medical Gases.**
- **BS 5682**                        **Probes (Quick Connectors) for use with medical gas pipeline systems.**

**ISO 9001 / EN 46001**

**CE 0473**
