

MEDICAL GAS HOSE ASSEMBLIES

Description

Medical Gas Hose Assemblies comprise a length of colour coded reinforced PVC anti-static hose, an inlet end connector and an outlet end connector. Both end connectors are permanently crimped to the hose with a ferrule, which is covered with colour coded banding.

Medical Gas Hose Assemblies are available for oxygen, nitrous oxide, 50% oxygen/50% nitrous oxide mixture, medical air, surgical air, medical vacuum and AGSS.

The inlet end connector can be either a NIST Nipple & Nut or a Probe. The outlet end connector can be either a NIST Nipple & Nut, a Probe, a NIST Body or a Terminal Unit.

Designed to meet the requirements of;

- **HTM 2022** **Medical Gas Pipeline Systems.**
- **C11** **NHS Model Engineering Specification – Medical Gases.**
- **BS EN 739** **Low pressure hose assemblies for use with medical gases.**
- **BS EN 737-1** **Terminal units for compressed medical gases and vacuum.**
- **BS 5682** **Specification for probes (quick connectors) for medical gases**
- **BS 6834** **Active anaesthetic gas scavenging systems.**
